Retool

The fastest way to build internal software

Investor update

SYNTHETIC DEMO DECK with DELIBERATELY FALSE figures, made to test fact-checking. Not issued by Retool. Not investment advice.

THE PROBLEM

Internal tools take too long to build

- Engineering teams spend months on admin screens, forms and permissions

- Most of that work repeats from company to company

- Teams fall back on spreadsheets and half-built tools

SYNTHETIC DEMO DECK with DELIBERATELY FALSE figures, made to test fact-checking. Not issued by Retool. Not investment advice.

THE SOLUTION

Build internal apps in days, not months

- A visual builder that connects to any database or API

- Permissions, audit logs and hosting are built in

- Engineers stay in control with code where they need it

SYNTHETIC DEMO DECK with DELIBERATELY FALSE figures, made to test fact-checking. Not issued by Retool. Not investment advice.

Who we are

- Founded in 2012

- Headquartered in Austin, Texas

BUSINESS MODEL

Subscription software at scale

$200M

annual recurring revenue (ARR)

- Revenue is growing 3x year over year

- Revenue comes mainly from large enterprises

SYNTHETIC DEMO DECK with DELIBERATELY FALSE figures, made to test fact-checking. Not issued by Retool. Not investment advice.

TEAM

A fast-growing company

1,200

employees

- Headcount grew 100% year over year

- Founded by David Hsu and Jonas Wexford-Pryce

FUNDING

Top-tier investors

$400M

raised in total

- Latest round: Series D of $150 million in 2026

- Backed by Tiger Global and SoftBank

MARKET

Companies keep building internal software

- Low-code and internal tools are our market

- AI makes internal tools faster to build

- Security and governance matter more every year

THE ASK

Raising now

- Raising $300 million

- At a $5 billion valuation
